● ROAD STATISTICS
YEARBOOK 2017 ●

INTRODUCTION

The ERF is pleased to present you with the
‘ERF Road Statistics Yearbook 2017’.

This new edition contains important updated information on road transport sector and road infrastructure in Europe and beyond.

More than ever, the road infrastructure is an essential key element of the global mobility and the road sector is constantly striving to provide citizens with the accessible, efficient and safe mobility they deserve.

We are convinced that this Yearbook will provide you with the same interesting and fruitful information as the previous editions.

● CONTENTS

1.

General Data

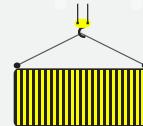

2.

Road Network

3.

Infrastructure Financing

5.

Freight Transport

4.

Road Maintenance & Investment

6.

Passenger Transport

7.

- *Safety*

8.

- *Taxation*

10.

- *Case Studies*

9.

- *Environment*

Introduction

Contents

Symbols & Abbreviations

General data

p.12

- 1.1 Percentage of turnover by mode of transport in EU 28
- 1.2 Transport growth in EU 28
- 1.3 Annual growth rates EU 28
- 1.4 Employment by mode of transport in EU countries
- 1.5 Employment by mode of transport in EU 28

Road Network

p.18

- 2.1 Length of total road network by category by country
- 2.2 Length of total road network by country
- 2.3 Density of the total road network by country
- 2.4 Length of motorway network by country
- 2.5 Length and Type of TEN-T Roads in EU 28
- 2.6 Proportion of motorways compared to the total road network by country
- 2.7 Density of motorways by country
- 2.8 Passenger cars per km of motorway by country
- 2.9 Transport network comparison between EU 28, USA, Japan, Russia and China
- 2.10 Density of motorways: comparison between EU 28, USA, Japan, Russia and China

Infrastructure Financing

p.26

- 3.1 Toll net revenues in selected countries
- 3.2 Budget managed by INEA
- 3.3 European Investment Bank Loans for Transport to EU 28
- 3.4 European Investment Bank Loans for Transport to EU 28
- 3.5 World Bank Total Transport Lending
- 3.6 Transport Lending Breakdown by Region

Road Maintenance and Investment

p.32

- 4.1 Gross investment spending in road infrastructure in selected countries
- 4.2 Investment in inland transport infrastructure in EU 28
- 4.3 Volume of investment in inland transport infrastructure by region
- 4.4 Distribution of infrastructure investment between modes in EU 28
- 4.5 Maintenance expenditures in road infrastructure in selected countries
- 4.6 Maintenance expenditures in road infrastructure in selected countries

Freight Transport

p.38

- 5.1 Transport of goods, performance by mode in EU 28
- 5.2 Goods transport by mode in EU 28
- 5.3 Inland transport modal split in EU 28
- 5.4 Inland transport modal split in EU 28
- 5.5 Performance of inland freight transport by mode in EU countries
- 5.6 Performance by mode for inland freight transport in EU 28
- 5.7 Total road transport by group of goods in EU countries
- 5.8 Transport of dangerous goods in EU countries
- 5.9 Registration of commercial vehicles in EU and selected countries

Passenger Transport

p.46

- 6.1 Transport of passengers by mode in EU 28
- 6.2 Evolution of passenger transport by mode in EU 28
- 6.3 Passenger transport modal split in EU 28
- 6.4 Modal split of passenger transport on land by country in EU countries
- 6.5 Passenger vehicles by country
- 6.6 Motorisation by country, 2014
- 6.7 New passenger car registration per 1.000 inhabitants in EU countries
- 6.8 Motorcycle registrations in EU countries
- 6.9 Transport of passengers per mode: comparison EU 28/World
- 6.10 Motorisation: comparison EU 28/ World
- 6.11 Trends and outlooks in passenger transport demand for the different modes of transport in EU

Safety

p.56

- 7.1 Road accidents involving personal injury by country
- 7.2 Road accidents involving personal injury per one thousand population in EU countries
- 7.3 Road fatalities in EU countries
- 7.4 Percentage change in road fatalities between 2002 and 2015
- 7.5 Road fatalities country rankings
- 7.6 Lives saved per million inhabitants in EU countries in 2015
- 7.7 Evolution of road fatalities and injured in EU 28
- 7.8 Road fatalities by mode of transport in EU 28
- 7.9 PTWs fatalities in selected EU countries
- 7.10 Road fatalities by gender in EU countries
- 7.11 Road fatalities by age group in EU-28 and selected countries
- 7.12 Road Fatalities (per 100.000 population) in EU 28 and selected countries
- 7.13 Speed limits, blood alcohol limits by country
- 7.14 Fatalities at 30 days by road user type in EU countries

Taxation

p.70

- 8.1 Taxes on acquisition of motor vehicles in EU countries
- 8.2 Fiscal income from motor vehicles in EU selected countries
- 8.3 Revenues from environmentally related taxes in % of GDP
- 8.4 CO2 based motor vehicle taxes in EU countries
- 8.5 Excise duties on fuels in EU countries at 1-1-2015 & 1-1-2017
- 8.6 At the pump prices of petroleum in EU countries, first quarter of 2017
- 8.7 Net charges per domestic haul by type in EU countries

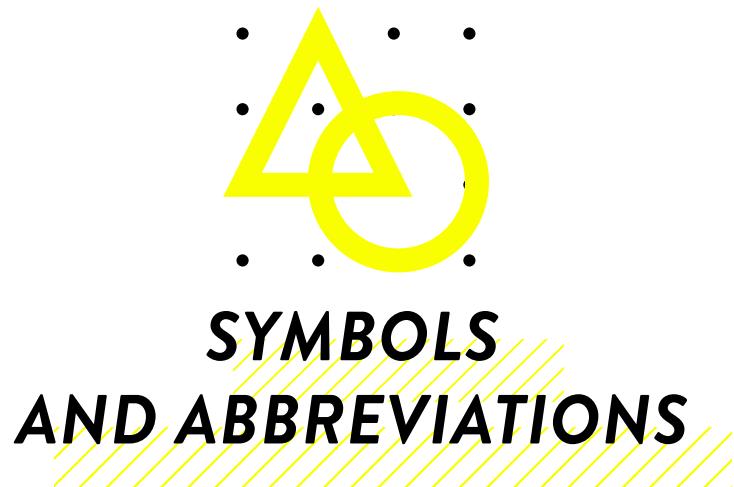

Environment

p.77

- 9.1 Comparison between freight and passenger transport evolution and CO2 emissions in EU 28
- 9.2 CO2 emissions from road transport in EU and selected countries
- 9.3 CO2 emissions from road passenger transport by mode in EU and selected countries
- 9.4 CO2 emissions from road freight transport in EU and selected countries
- 9.5 Average CO2 emissions per km from new passenger cars in EU
- 9.6 Fuel market share for new car registrations in EU
- 9.7 Biodiesel production in EU countries
- 9.8 Biofuels share in transport consumption in EU
- 9.9 Share of total CO2 emissions from fossil fuel by sector in EU
- 9.10 Final energy consumption by sector in EU countries

10. Case Study: Roads in Ethiopia

GENERAL DATA

1.1

Percentage of turnover by mode of transport in EU 28, 2013 (total €1,373 billion)

Source : EC

(*) Including all urban and suburban land transport modes (motor bus, tramway, streetcar, trolley bus, underground and elevated railways).

The above figures refer to employment only in those companies whose main activity lies in the mode concerned.

1.2

Transport growth in EU 28, evolution 1995-2014

Source: Eurostat

Notes :

- (1) : passenger cars, powered two-wheelers, buses & coaches, tram & metro, railways, intra-EU air, intra-EU sea
- (2) : road, rail, inland waterways, oil pipelines, intra-EU air, intra-EU sea

GDP: at constant year 2005 prices and exchange rates

1.3

Annual growth rates EU 28 (% change)

	1995 - 2014 p.a.	2000 - 2014 p.a.	2013 - 2014 p.a.
GDP at year 2005 prices and exchange rates	1,6%	1,2%	1,4%
Passenger transport (pkm)	1,1%	0,7%	1,8%
Freight transport (tkm)	1,1%	0,6%	1,4%

Source : EC

1.4

Employment by mode of transport in EU countries, 2013 (thousand)

Source: EC

Air and Sea: only domestic and intra-EU-28 transport; estimates for air and for sea (1995-2004)

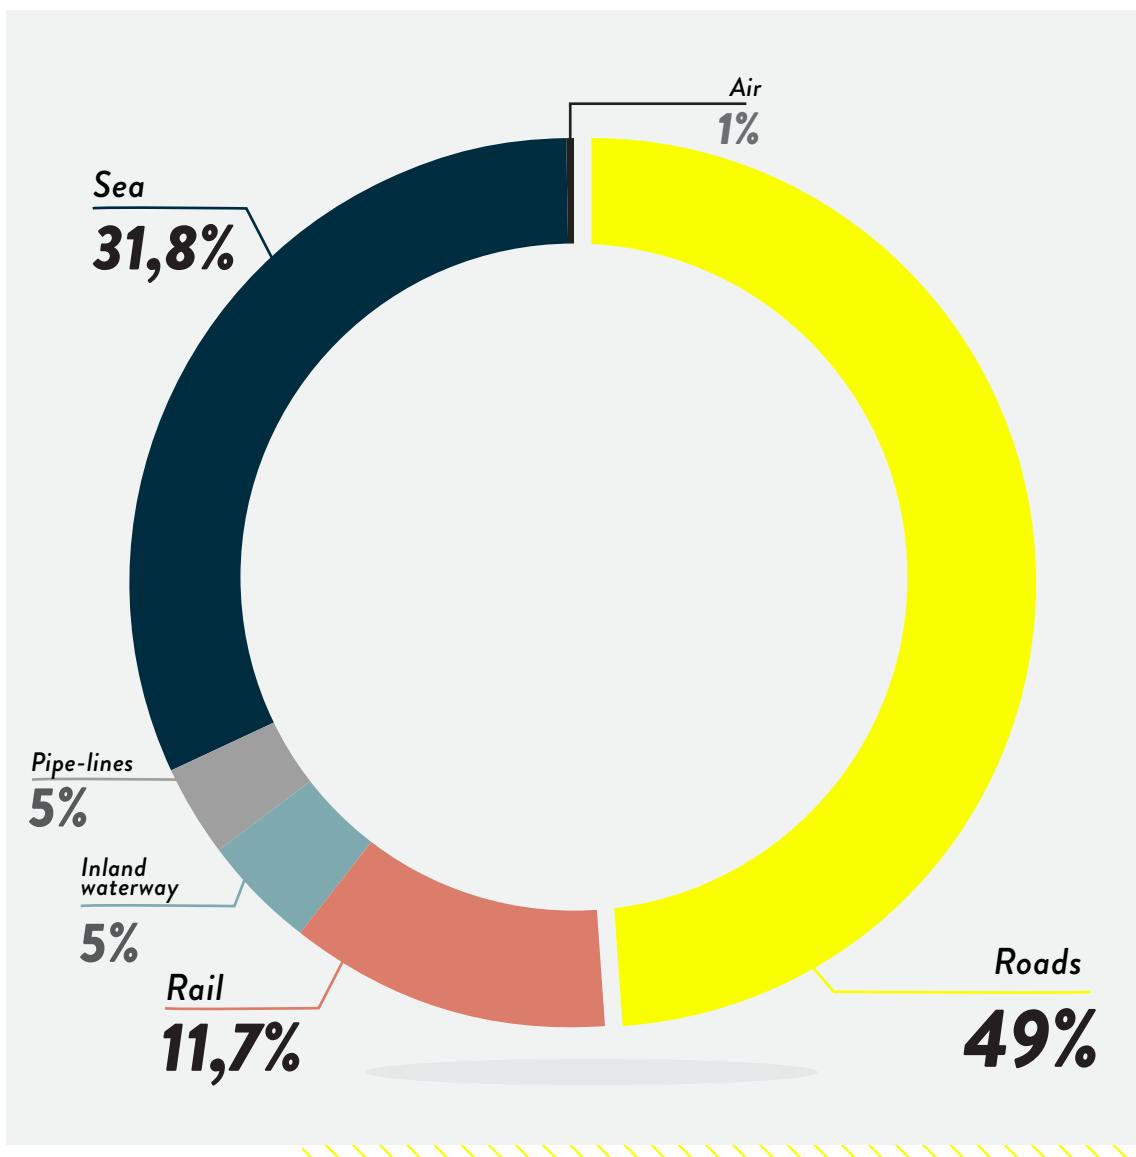

Road: national and international haulage by vehicles registered in the EU-28.

(1) The time series for maritime transport performance has been revised, for the period from 2005 to 2014, by replacing previous estimates on port-to port distances with more accurate measurements by Eurostat. The time series from 1995 to 2004 has been recalibrated by DG MOVE in line with the new Eurostat figures to avoid break in series. The revision of tkm figures mainly concerns the calculation of distance travelled and not the tonnages transported by sea.

5.2

Goods transport by mode in EU 28, 2014 (% of tkm)

Source: EC

Notes:

Air and Sea: only domestic and intra-EU-28 transport; provisional estimates

Road: national and international haulage by vehicles registered in the EU-28

(*) National and international haulage by vehicles registered in the reporting country (including cross-trade and cabotage). Only haulage of heavy goods vehicles (usually > 3,5 tonnes load capacity)

(**) For FI only shipborne transport (i.e. no floating)

(***) Data are not harmonised and therefore not fully comparable; in most countries, only pipelines longer than 40km are included. DE: only crude oil (i.e. no refined petroleum products)

Notes:

Data are not harmonised and therefore not fully comparable.

BE: Passenger cars data include pkm by vehicles registered as light goods vehicles but used as personal cars.

UK: Passenger data refer to Great Britain only; include pkm by vans.

UK: Buses and coaches data: GB data + 1.5 bln pkm throughout to account for Northern Ireland

FR: Urban rail data refer to the Paris Metro and RER (Réseau Express Régional) systems and to metros in other French cities.

PT: Urban rail data refer only to Lisbon and Porto Metro.

"* Public Service Obligation (PSO) means a requirement defined or determined by a competent authority in order to ensure public passenger transport services in the general interest that an operator, if it were considering its own commercial interests, would not assume or would not assume to the same extent or under the same conditions without reward."

Notes:

Motorisation: Passenger car stock at end of year n has been divided by the population on 1 January of year n+1

Stock of registered passenger cars, PTWs and buses and coaches: At end of year, except for BE (1 August).

Stock of registered passenger cars: Taxis are usually included.

Stock of registered buses and coaches: Data include buses, coaches, minibuses and sometimes also trolleybuses.

Stock of registered PTW: National vehicle stock data do not always include all powered two-wheelers and are therefore not fully comparable between countries. Break in time series due to inclusion of mopeds from 2001 in ES, from 2002 in SI and HR, from 2004 in LV, from 2005 in PL, from 2007 in LT.

Tricycles and quads are sometimes included in the data.

7.2

Road accidents involving personal injury per one thousand population in EU countries, 2015

Source: EC

Notes:

The definition of an accident involving personal injury differs from country to country.

The number of inhabitants used in this table is the sum of the population at 1 January 2014 and at 1 January 2015 divided by two.

7.3

Notes :

UK, IE, CY and MT drive on the left hand side of the road, the other Member States drive on the right hand side (Sweden since 3 September 1967). Signs in UK are in miles per hour.

The higher figure shown in the "outside built-up areas" column generally refers to the speed limit on dual carriageways that are not motorways.

Speed limits:

DE: Motorways: No general speed limit, recommended speed limit is 130 km/h (more than half the network has a speed limit of 120 km/h or less).

FR: Dual carriageways 110 km/h. If the road is wet : motorways 110 km/h, dual carriageways 90 km/h, other roads outside built-up areas 80 km/h.

IT: 150 km/h on certain 2x3 lane motorways if the operator so requests.

FI: in winter 100 km/h on motorways, 80 km/h on other roads.

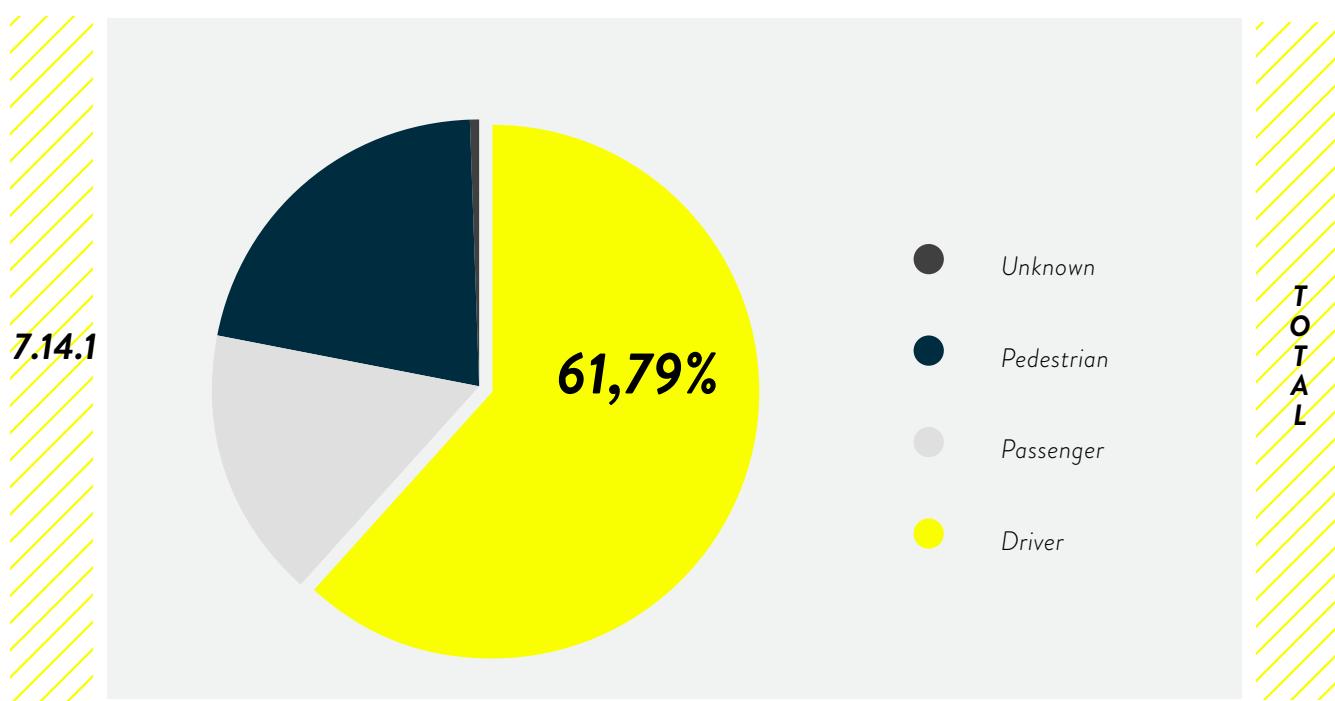

PL: Built-up areas: 50 km/h from 05h00 to 23h00, 60 km/h from 23h00 to 05h00.

Blood alcohol limits:

In many countries, special (more restrictive) rules apply to novice (i.e. new, unexperienced) and professional drivers

CASE STUDY

HISTORICAL BACKGROUND

Ethiopia is a large country with diverse and complex social fabric. A landlocked nation with an area of 1,1 million sq. km.

With a population exceeding 94million Ethiopia is the second most populous country in Africa next to Nigeria. Planned road construction efforts in Ethiopia began in early 18th century. Towards the end of the 19th and early decades of the 20th century, successful advancement in road construction has been witnessed. These efforts grew and led to the establishment of a semi-autonomous agency dedicated to design, construct and maintain roads. Even though the shape and nature of the agency has frequently changed due to the rise and fall of regimes, it has managed to maintain the core function of building, rehabilitating and managing road and road assets of the country until now.

Before 1978, Ethiopian Roads Authority followed a project-by-project approach planning method to construct and maintain roads. In 1997, the Road Sector Development Program (RSDP) was designed, a program which has enormously increased the road network coverage of the country. When RDSP was introduced, the aim was to enhance the quality and extent of road infrastructure. The review of the program showed encouraging results in terms of road coverage expansion and improvement of road condition. Currently, the total road network of Ethiopia stands at 140.000km (paved and unpaved) compared to 24.970km when the program was first initialised 20years ago. Nevertheless, there are still areas currently not served by road.

ROAD SAFETY

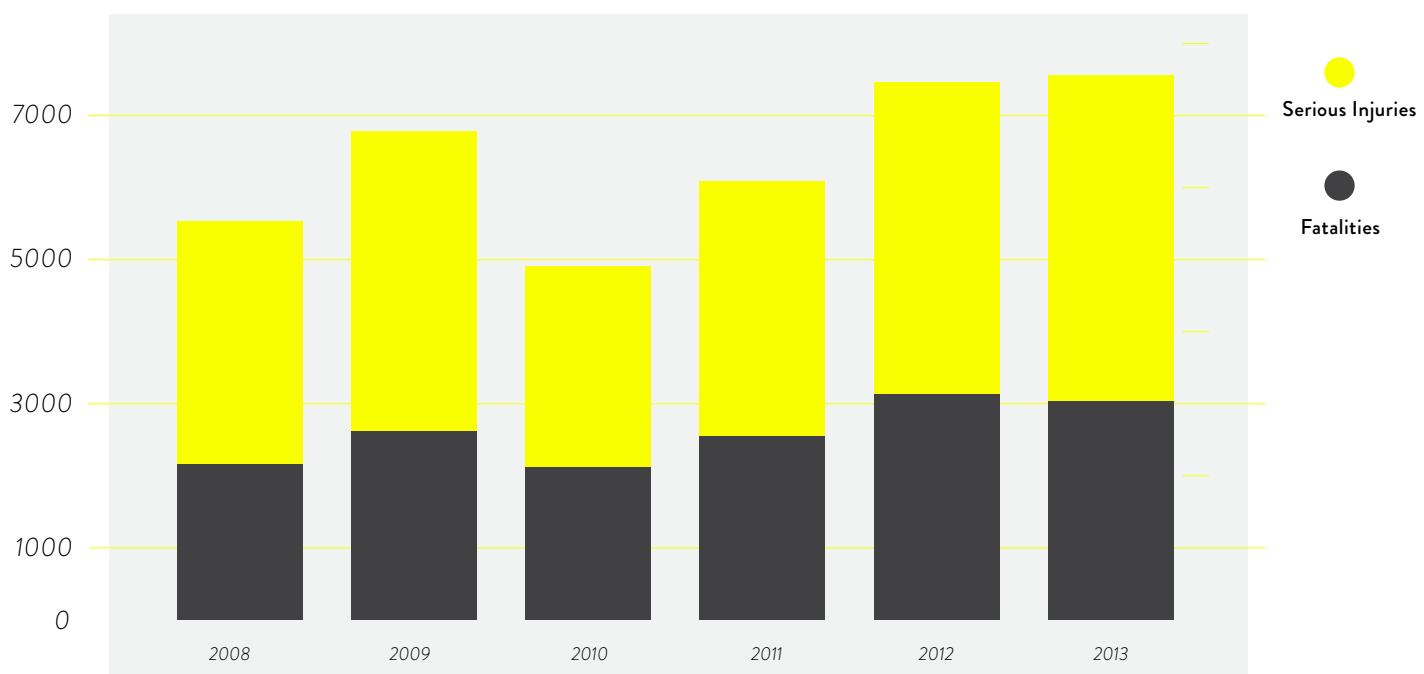

Since the introduction of Road Sector Development Program (RSDP) in 1997 the country is a victim of the inevitable steep increase in road traffic accidents because of the motorisation induced by the growing economy. As a country aspiring to become middle earning, the trend of not coping with the rapid motorisation in terms of safety and infrastructure demand is a significant challenge for Ethiopia. According to the WHO, the country stood among the top countries with devastating road safety status. Behavioural problems, poorly enforced road safety regulations, inadequate and substandard road infrastructure, and higher population of vulnerable road users (mostly pedestrians) combined with an ever-increasing number of vehicles are the core reasons of road safety problems in Ethiopia.
